

## Full Stack Software Developer - Work From Home

### Description

We are seeking a talented Full-Stack Senior Software Engineer (high level) with experience in designing, developing, and implementing software solutions. An advanced developer has an in-depth knowledge of software development patterns and practices. He or she will be able to routinely produce high-quality work products in all but the most complex or exceptional of situations without supervision and can effectively guide or supervise the work of others. An advanced level professional will usually be able to intuitively assess the best course of action to take in each situation and understand how and when to apply guidelines. This level software developer has knowledge of related tasks and techniques and repeated experience performing in a variety of contexts and situations. He or she performs competency well on own, applies guidelines within contexts, knows when off track and can self-correct. This individual may lead or mentor others in practicing and learning competency from a tactical perspective.

### Requirements

- At least 5+ years of software development experience
- Experience as a full stack developer using .NET Core
- Experience with ASP .NET Core
- Experience with AWS or Azure cloud services
- Experience with Angular, React, Vue, or other front-end development framework or expert level JavaScript skills
- Experience with relational databases such as SQL Server, MySQL, or PostgreSQL
- Blazor Web Framework.
- Experience with Jira or Azure DevOps
- Experience with Web Services and Object-Oriented Programming
- Thorough understanding of relational databases
- Must have a good communication.
