

Job Title: Senior React Native Developer

Job Summary:

We are seeking a highly skilled and experienced Senior React Native Developer to join our team. The successful candidate will be responsible for developing and maintaining high-quality, bug-free mobile applications for both iOS and Android platforms.

Responsibilities:

- Develop and maintain high-quality mobile applications using React Native
- Write clean, well-documented, and efficient code
- Ensure the application is fully tested and bug-free before releasing to production
- Collaborate with cross-functional teams, including designers and product managers, to implement new features and improvements
- Manage the release process for both iOS and Android platforms, including debugging and troubleshooting issues that may arise during the release process
- Stay up-to-date with the latest developments in mobile app development and incorporate new technologies as appropriate
- Mentor junior developers and provide technical guidance as needed

Requirements:

- Bachelor's degree in Computer Science or a related field
- At least 5 years of experience in developing mobile applications using React Native
- Strong understanding of iOS and Android platforms
- Experience with Git or other version control systems
- Experience working in an Agile development environment
- Strong knowledge of JavaScript, React Native, and its ecosystem
- Experience with Redux, Flux, or similar state management frameworks
- Familiarity with native iOS development tools and languages
- Knowledge of RESTful APIs, GraphQL, and other web technologies
- Strong understanding of mobile UI/UX best practices
- Experience with automated testing frameworks such as Jest, Enzyme, and Appium
- Ability to work collaboratively in a fast-paced environment
- Excellent problem-solving, debugging, and troubleshooting skills
- Strong communication and interpersonal skills.
- Strong attention to detail and commitment to delivering high-quality work
- Familiarity with other mobile development technologies. (e.g., Swift, Java, Kotlin) is a plus
- Familiarity with native Android development tools and language is a plus.
- Good to have own IOS devices (BYOD) in WFH situation for unit testing and development.
